Back end
Rails, Node.Js, PostgreSQL, MySQL

Deployment & Dev Tools
Git, Heroku, JIRA, parts of AWS

Work Experience

Software Developer Apprenticeship   June-Dec 2018
Skip The Dishes
- Worked in a fast paced environment, helping build & maintain Canada's leading food delivery application.
- Learned many of the best practices associated with a large scale project.

Air Quality Technologist,   2017-2018
Saskatchewan Research Council
- Worked on industrial source emissions testing projects all across Saskatchewan in a team oriented environment.

Education

Full Stack Web Development Certificate
@ CodeCore Web Development Bootcamp   2018

- VANCOUVER, BC

Environmental Engineering Technology Diploma
@ Saskatchewan Polytechnic (Formerly SIAST)   2016

- MOOSE JAW, SK

Projects

Slackr
- A lifestyle app that gives users visual feedback about how their daily habits correlate with their mood.
- Personal project built with modern web development tools, using Rails for the backend and React for the client-side, making use of multiple libraries.
- http://slackr.ca

Drill Ninjaz
- An educational platform designed to test the user's coding skills and keep track of their progress.
- Was developed over a weekend in a hackathon style group project.
- My contributions can be seen in the project repo's readme: https://github.com/wcorman/drill-ninjaz
